EXPERIENCE

Proyecto ToxicZone ecommerce

Campuslands - 2024

Development of a website for an online store specialized in gamer products, using HTML and CSS. The goal is to create a modern, attractive and easy-to-navigate interface that reflects the brand's unique aesthetic.

Claro Soft

Campuslands - 2024

Creation of software in Python for a local operator, designed to manage purchases, sales and user administration. The system will use local databases to store the information.

Finca Napoles

Campuslands - 2024

Implementation of a MySQL database to manage the resources of an agricultural farm. The database will organize information about employees, customers, suppliers, animals and agricultural products to optimize production, sales and purchasing processes.
